

Imagine a paperless filing solution with auto filing and instant retrieval. MedFORCE Scan — the premier HIPAA compliant paperless office system with the look and feel of your paper files.

- Professionals spend about 60% of their time handling paper
- Large organizations lose one document every 12 seconds
- 7.5% of documents are lost forever!
- 3% of documents are filed incorrectly
- The average executive spends 3 hours per week hunting for mislabeled, misfiled or lost documents
- *It's time to go paperless...*

MedFORCE Scan provides a secure way to scan all of your patient files and then retrieve them electronically. MedFORCE Scan is a complete paperless solution offering the ability to scan patient records, create/import electronic forms, import faxes, integrate with your billing software and manage your EOMBs. Your UPS tracking information can also be imported automatically.

Cut your filing time by 80% and reduce manual filing errors with the use of barcodes and other auto-filing features.

- Track your patients' history in one place
- Search and locate any document with user-specified parameters
- Add sticky notes, user-defined stamps, highlight and more, just like paper files
- Import ERNs to manage and minimize denied claims
- Handle paper EOMBs more efficiently
- Easily achieve full compliance with HIPAA requirements. Produce HIPAA disclosure reports on-demand
- Import your UPS tracking information automatically from the UPS website
- Integrate with any Windows or DOS-based billing software
- Create your own electronic forms using the integrated Form Designer
- Track and manage all operational activities and documents with MedFORCE WorkFLOW
