

# Medforce Apps

*Focused solutions to common challenges*

Decades of experience in the healthcare industry have given us perspective on some universal barriers to maximizing productivity. In response, we developed Medforce Apps: turnkey solutions that address common areas of inefficiency.

Medforce Apps are affordable, pre-configured workflow solutions designed to solve specific problems. Built on our CommandCenter business process management platform, all of our Apps give you a central resource to ensure the consistency, efficiency, and visibility you need to stay in control of your critical processes.

The Apps take advantage of standardization and automation to minimize effort and opportunity for error, and they use alerts and escalations to make sure nothing falls through the cracks. Reporting gives you the insight you need to improve resource allocation and the confidence you need to keep your business running smoothly.

Medforce Apps can be purchased and used with or without a full version of CommandCenter. Pricing depends on users and any additional customization your company may need.

## A sampling of our Apps includes:

- Referral Management
- Fax Management
- Overpayments Management
- Procurement Approval
- Vendor Invoice Management
- Audit & Appeals Management
- Intake Management
