

Fax Management App

Take control of your inbound faxes

Do you feel overwhelmed by managing incoming faxes across locations and multiple fax lines? Do you use email to distribute inbound faxes to be worked? Stop worrying about whether faxes are routed appropriately and worked in a timely manner with Medforce's Fax Management App.

Whether you use fax to receive referrals, orders, reimbursement or other mission-critical documents, you need a centralized resource to make sure nothing falls through the cracks. Email programs just weren't designed to provide the level of fax oversight you need to keep your business running efficiently.

Our Fax Management App gives you visibility, insight and control to make sure the work is completed fully and on time. Incoming faxes go straight into Medforce and trigger workflow task creation, giving you unprecedented control over fax handling.

The Medforce Fax Management App can be used with any third-party cloud based or on-prem electronic fax solution. It can also be bundled with Medforce's Fax Service for additional cost savings.

Feature Highlights Include:

- Automatically assign faxes to be worked
- Keep a record of all incoming faxes
- Track the ongoing status of inbound faxes
- Guard against human error and lost documents
- Use escalations and alerts to ensure timeliness
- Easily reassign work to cover employee leave
- Effortlessly use your Medforce system for permanent fax storage
