CommandCenter

Business process management to maximize productivity

Medforce Command Center empowers you to build the most efficient organization possible. Improve productivity and increase profit by establishing best practices, streamlining processes, maximizing automation, and making smarter decisions every day.

CommandCenter process management software is completely tailored for each business and puts you in control. You use our intuitive workflow creation tools to program the who, what, and when of each process to ensure all work is complete, accurate, and on time. The built-in business analytics reports, customizable views and dashboards mean you and your employees never miss a step and always tackle the highest priority work first.

CommandCenter is a platform that enables your success. It works in any department from intake and claims to mailroom, AP and HR, and integrates with most business applications. Whether your processes are simple or complex, it gives you the visibility you need to recover more time and money for your mission.

Map, Monitor & Optimize

- Improve visibility
