ContentCenter

Document management that saves time, money and hassle

Medforce Content Center is a secure, feature-rich electronic filing system that increases efficiency and employee effectiveness. Improve collaboration across your entire organization with a central resource that provides instant access to vital information and keeps everyone on the same page

Documents and data are the lifeblood of your organization. Operations can come to a halt if you can't find the information you need. **Content**Center has the industry's highest auto-filing rates and most advanced OCR. Whether you scan paper or import electronic files, you can reduce your filing time by over 80% and erase the consequences of manual errors.

Designed by users, our software mimics live work and is highly customizable to your unique data capture and storage needs. And, we back our products with unparalleled customer service, training and support.

Going paperless simplifies your operation and frees precious time and money that you can redirect to high priority activities.
