FormsCenter

Electronic data capture to connect and track your business

Medforce Forms Center allows you to standardize data capture through custom form design. Replace your business forms with electronic forms, improve collaboration among team members, and ensure consistent information sharing. Save time, increase accuracy, and improve productivity.

Your business runs on data. **Forms**Center makes the capture and use of vital information easy and efficient. Eliminate the need for hand written forms and duplicate data entry. Stop managing your work through disparate, manual spreadsheets. You decide the information your business needs and use the comprehensive toolbox to design and update forms exactly to your specifications.

FormsCenter enables you to gather and track data in a clear, consistent and mandated way, whether you are collecting information from external sources, internal employees, or 3rd party software. Integrate all of your software and simplify data entry by easily importing and exporting information and pre-populating fields.

Always have the information you need

- Ensure all data is collected correctly
- Reduce risk of missing information
- Centrally store large volumes of data
- Easily adapt forms as your business needs change
- Run custom reporting with a click of a button
- Use access rights to control data security
- Quickly import information from other sources
- Export data in a variety of formats

Minimize data entry effort and maximize data automation with **Forms**Center.
