

MEDFORCE

THE POWER OF PRODUCTIVITY

Medforce Technologies provides productivity-enhancing software and services to help healthcare organizations adapt quickly to change and do more with less. We offer the industry's most feature-rich software that conforms to your preferred way of operating and returns more time and money to fuel your mission.

Use **Medforce** solutions across all areas of your business, from intake and claims to mailroom, AP and HR. We've built our software to be open and integrate with the business applications you use most.

Our collaborative nature and desire for true partnership extends beyond our software. We make your goals our goals. Our flexible and highly-customizable document and process management products support daily decision making based on real-time information and strategic priority.

Medforce software and services are backed by a responsive and dedicated support staff and fueled by an innovative development team. We consistently invest in product development and enhancement, working to stay ahead of your needs. We ensure leading edge features and functionality in service of improving productivity, saving cost, and empowering your operations.
